

# Derknott SCOPE freeware DEVICES

## 1. Filter

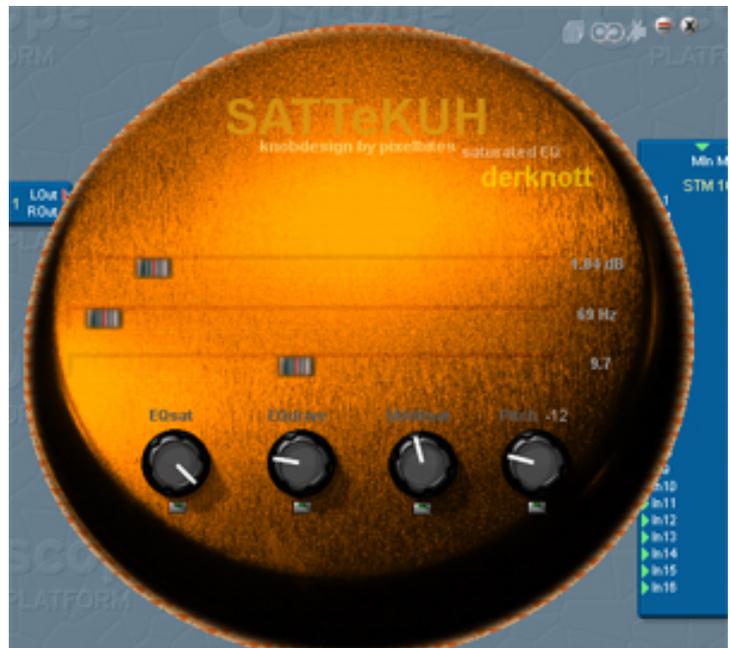

moveqclassic & moveqfresh

- => making EQ-parameters move
- => Q movement not perfect

SATTeKUH

- => very fat saturated sounds
- => very good for fat bassdrum...
- => still bad looking
- => soon GUI update

FISHx

- => very flexibel Shaper/Filter
- => for fully funct. needs FLEXOR
- => read installation instructions!!!
- => „x-series“ in one device

## Fix / FixCW

- => „x-series“ -devices
- => very flexibel Filters
- => FLX needs FLEXOR
- => FlxCW works without FLEXOR
- => read installation instructions!!

## The shilo-family

- => cutting filters & Multiband

## Pulsderzeit & Pulsderzeit +/- 24

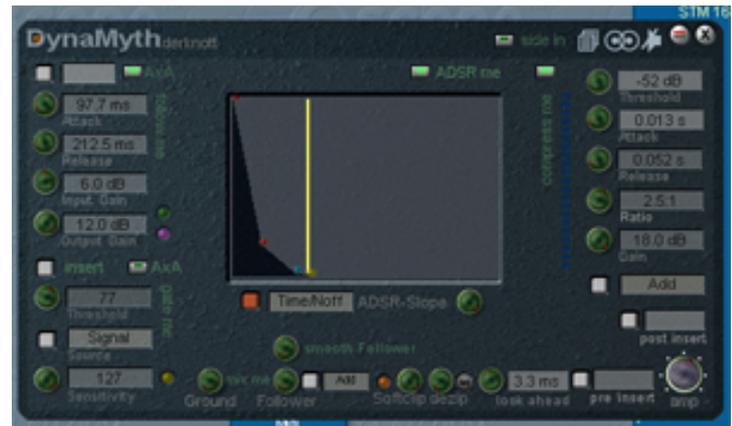

- => simple Eqs
- => be carefull with clipping!

## 2. Dynamics

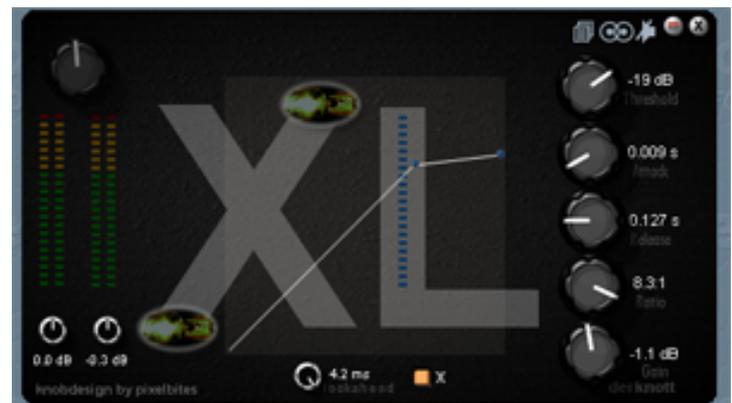

### DYNAMYTH

- => very flexible dynamic tool
- => editing punch
- => envelope follower
- => peak gater
- => kind of compressor/expander

### XL

- => very fat limiting compressor

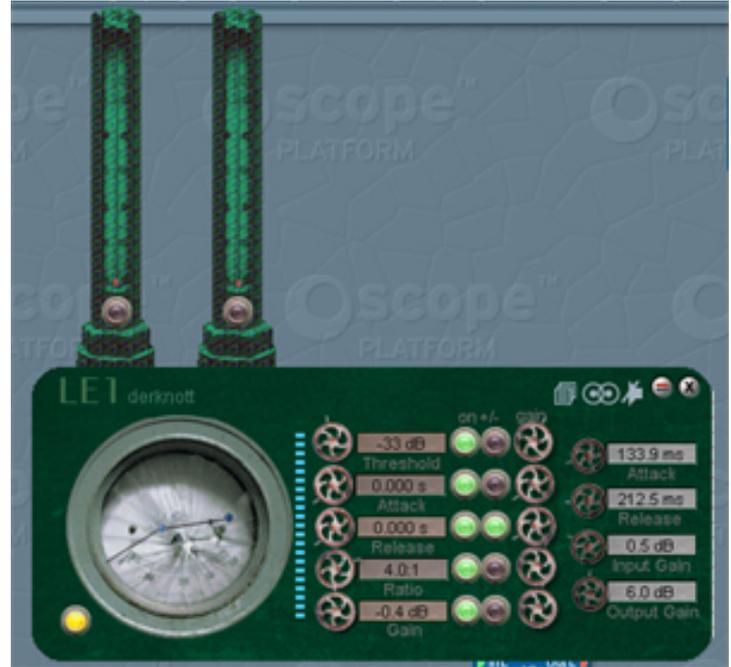

### LC1

- => softknee-compressor
- => moving values make different regulation-curves
- => very innovative subtle sounds
- => very DSP friendly

LE1

- => Living Expander
- => moving values make different regulation-curves

Tong

- => Great, but complex compressor
- => moving values make it living
- => curve can be extremely manipulated

### 3. Drive

SHx

- => „x-series“ -devices
- => Shaper with selectable CW and Flexor shapers
- => needs FLEXOR for full functionality but works fine as simple CW saturator too
- => READ INSTALLATION-INSTRUKTIONEN !!!!

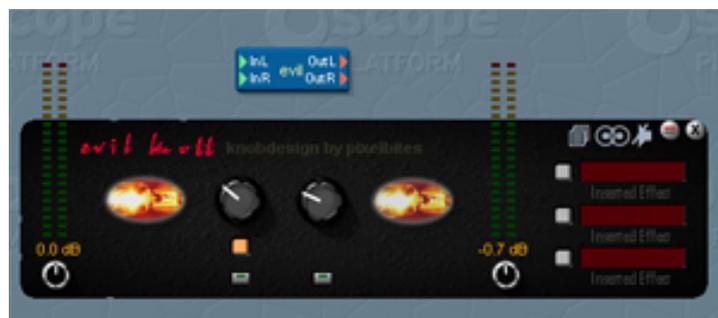

FISHx

- => very flexibel Shaper/Filter
- => for fully funct. needs FLEXOR
- => read installation instructions !!!
- => whole „x-series“ in one device

evilknot

- => flexible drive-module
- => works from light sat to very nasty distortions
- => inserts for Eqs etc.!!!

## 4. Zampler

ZAM+

- => loads sample programs!!!
- => can't load single samples
- => multiple outputs

MODzam

- => sample-program-player for Modular

# 5. LOOPING

## LOOPPlay

- => stereo-LOOP generator
- => cool for live music!
- => one version with, one without metronome

## LOOPPlayMM

- => 8x mono -LOOP generator with single outputs
- => cool for live music!
- => one version with, one without metronome

# 6. Helper

„DIE KNOTTS“ with AUX,  
MULTI, HYPER...

=> multiinserts & co.

GUTU

=> guitar-tuner

Retro-Meter

=> great looking Meter for  
measuring kg/cm<sup>3</sup>

Phasecheck, Tester

=> small utilities for testing phase

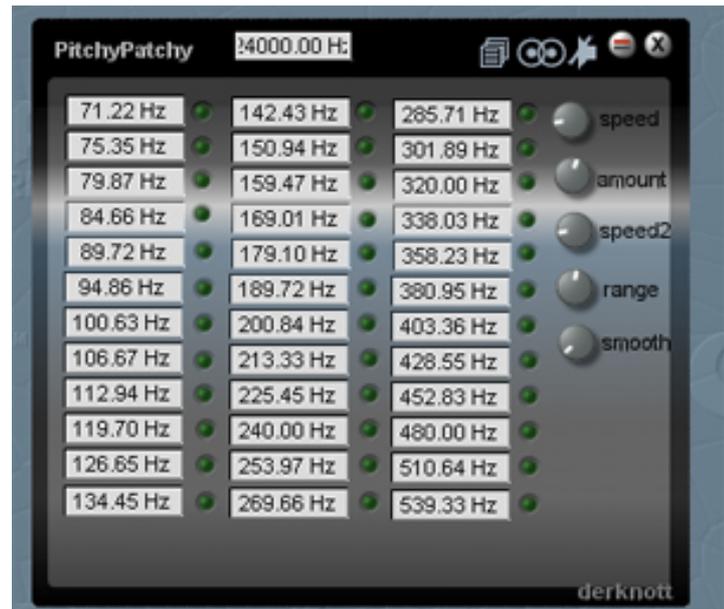

## 7. Strange

PitchyPatchy A/B

=> try it, it should be kind of automatic tuner, but it destroys the sound completely

;-)

Use these devices on your own risk. Although I do my best for making them work in the way they should do, I can't give garanty for anything. The devices are freeware and everybody decides on his/her own to use them or not.

Don't distribute these devices. Everybody may find them on [www.planetz.com](http://www.planetz.com).

All devices & graphics © 2006 Martin Knott. Knobs in some devices designed by pixelbites.

If you like some of my devices and use a device regularly please buy the upcoming MOVEQ+. It is a great piece of software for a cheap price. That way you support the immense work which is involved in these devices and will be involved in further development. That way you also support creamware, which is in my opinion one of best audio-developers ever.
